Historical confirmation
3,360 jobs
seeds 5000–5039
V6
Independent confirmation
12,800 trajectory and replay jobs
seeds 7000–7039
Historical/development evidence — not pooled with V6
b
V6 confirmation workflow
16 environments
4 tasks × 2 splits × 2 models
40 seed blocks
paired seeds 7000–7039
Separate outcomes
L1 calibration
L4 discovery
Locked inference
paired bootstrap and sign-flip
separate BH families
Registered L1 and L4 families remain separate; environment effects are heterogeneity diagnostics.
